3-5 December 2020

Hall no. 4, Bombay Exhibition Center,
Goregaon, Mumbai
10:00 am to 6:00 pm

“Make in India” and the Indian Construction & Infrastructure Sector

On September 2014, the Government of India launched the "Make in India" initiative and invited Indian and international investors to design, manufacture, and export their products using Indian infrastructure. The Government also promised additional support to make trade between countries easier than before.

The "Make in India" is not just a standalone concept but also a campaign that changed the business environment in India. The recently announced campaign for Self-Reliant India (Atmanirbhar Bharat) reiterates the importance and need of the "Make in India" initiative.

Both these initiatives complement each other and will boost not only indigenous industries but also foreign investments in India.

India has already gained attention of the global investors. This is mainly because of several powerful factors such as availability of skilled workforce, access to the large markets, lower cost of production, the introduction of investor-friendly policies and the existence of a stable democratic government. Now, the construction and the infrastructure sector is expected to receive greater push due to the "Make in India" initiative and the "Atmanirbhar Bharat" campaign. This will further act as a fuel for propelling India's industrial growth.

On 30th May 2020, we organised an exclusive webinar to explore this in detail. Please click the link mentioned in the text above to view the webinar.

About Us

- Concrete Show India is premium expo dedicated to the Construction and Infrastructure sector.
- The event promotes a solution-oriented approach which enables suppliers to engage with the construction & infrastructure value chain.
